

**Elf Frank Myrrh:** Greetings from the North Pole news center, I'm Elf Frank Myrrh of North Pole Radio News. Santa's going to have a lot of new technology available to him on his new sleigh this year. Joining me from the Sleigh Barn with information about what's new is Elf Crash Murphy, our International Director of Santa Trackers. Crash, what can you tell us?

**Elf Crash Murphy:** Frank, I'm sitting behind the wheel so to speak and I have to tell you there's no more sophisticated machine on earth than Santa's sleigh. This thing has every possible bell and whistle and it has to be run by some super computer or something.

**Elf Frank:** Is it very different than his sleigh last year or ones you've seen before?

**Elf Crash:** Santa has always had some really out-of-this-world technology but this is next level in the extreme, Frank. It's not just a heads up display, but it's a hologram, meaning Santa sees everything in 3-D. It's totally wild, Frank. And the information is unbelievable. I look you up for giggles and I gotta tell you Frank, I've learned some things about you I never suspected.

**Elf Frank:** Oh really? Like what?

**Elf Crash:** Like when you were four you asked Santa for a Chatty Cathy doll.

**Elf Frank:** Well, I had a sister named Cathy and that doll looked just like her.

**Elf Crash:** Uh-huh. And what did you want the doll for, Frank? To dress her up?

**Elf Frank:** No, to stick pins in. She was my sister, Crash. I was FOUR.

**Elf Crash:** Hey, you don't have to get defensive. Besides that's nothing compared to what you asked for when you were 9, Frank.

**Elf Frank:** Ok, Crash, you made your point about the technology on Santa's sleigh this year. From the North Pole, where letters to Santa used to be confidential, I'm Elf Frank Myrrh reporting for SantaUpdate.com on the Kringle Radio Network.
