

Elf Frank Myrrh: Greetings once again from the North Pole News Desk, I'm Elf Frank Myrrh of North Pole Radio News. We have news coming out of North Pole Flight Command and joining us from there is the International Director of Santa Trackers, Elf Crash Murphy. Crash, what's new in Flight Command?

Elf Crash Murphy: We're getting good information these days about the progress of the test flights of Santa's Sleigh and really good news about Santa's new sleigh itself. It is scoring very well on all the tests and the rumor mill here in Flight Command is buzzing that this sleigh could be Santa's fastest ever.

Elf Frank: That's great news but I'm sure the big question is whether or not Santa will be able to push that sleigh to record speeds, Crash. If the workshop is behind and won't be getting the last minute stuff to Santa in time, what good is a super fast sleigh going to do him?

Elf Crash: Well, what if they get that stuff to Santa just in time, Frank? Won't he need a record breaking fast sleigh to get that stuff delivered?

Elf Frank: I had not really thought of it that way, Crash.

Elf Crash: I'll tell you something right now we're not reporting much on, Frank. Santa is watching these test flights like he's never watched them before. He gets a flash report of the flight dynamics of this sleigh and he's constantly calling Flight Command to share ideas after he reads that report every day. Santa is thinking of everything right now.

Elf Frank: Do you think that thinking includes thinking about all the things that could go wrong or right on Christmas Eve?

Elf Crash: That's exactly what he's thinking, Frank.

Elf Frank: Ok, Crash, lets keep an eye on the sleigh thing, maybe it'll turn out to save Christmas this year. From the North Pole news desk, where we love love love sleighs that go fast, I'm Elf Frank Myrrh reporting for SantaUpdate.com on the Kringle Radio Network.
