

Elf Frank Myrrh: Greetings again from the North Pole News Desk, I'm Elf Frank Myrrh of North Pole Radio News. Now that Halloween is behind us, and Santa is once again away from the North Pole meeting with believers everywhere, we are seeing record numbers of site visitors to the North Pole websites, especially SantaUpdate.com. Here to answer some of the questions coming in is our eye in the sky reporter and the International Director of Santa Trackers, Elf Crash Murphy. Crash, we're getting lots of questions again and the biggest one seems to be about Operation Merry Christmas and what it means. Do you want to give a quick answer to that question?

Elf Crash Murphy: Sure, Frank. It's what we do.

Elf Frank: That's it? That's the answer?

Elf Crash: That's it, Frank. Look, we're elves. We work for Santa. Everyone knows what an elf is. And everyone knows who Santa is. We don't need to make this complicated. Operation Merry Christmas is just what we do.

Elf Frank: Yeah, but we have to give more than that, don't we?

Elf Crash: Why? Santa either comes on Christmas or he doesn't, Frank. If he comes, Operation Merry Christmas is a success. If he doesn't come, it doesn't matter what we have to say about it.

Elf Frank: But Santa has never failed to come, Crash.

Elf Crash: Bingo.

Elf Frank: That's it? Bingo?

Elf Crash: Let's not make it complicated, Frank.

Elf Frank: You're oddly a man of few words today, Crash.

Elf Crash: In my years of answering questions I have learned that sometimes the best answer is the short answer and that's definitely true of this question. The truth is, if you want to really understand what Operation Merry Christmas is then stick around for the next 46 days and listen to my buddy Elf Frank on the radio. He'll tell the story and by the time Santa gets back from flying around the world you'll understand Operation Merry Christmas perfectly.

Elf Frank: Thanks for the endorsement, Crash. For North Pole Radio News, where I feel no pressure at all now, I'm Elf Frank Myrrh reporting for SantaUpdate.com on the Kringle Radio Network.
